

Statement by Citizens of Newfoundland and Labrador

Whereas the Government of Newfoundland and Labrador is using vaccine passports and mandates as a behavior modification tool in order to coerce the people of Newfoundland and Labrador into getting vaccinated with the experimental Covid Gene therapy,

Whereas the experimental Covid Gene therapy, otherwise known as vaccine, has been shown to be less effective, and more harmful than other available treatment modalities, thereby causing many detrimental and adverse outcomes,

Whereas there is voluminous scientific and frontline evidence available on the Internet from reliable sources, both scientific and medical, advocating other more effective and safe treatment modalities than vaccinations, masks, and lockdowns,

Whereas many other treatment modalities exist, such as ivermectin, hydroxychloroquine, zinc, monoclonal antibodies, etc., and have proven very safe and successful,

Whereas the PCR test, on which all the medical decisions made by the government, has proven to be highly inaccurate,

Whereas the advice from the WHO and NIH has been shown to be inconsistent, misleading and inaccurate,

Whereas the Charter of Rights and Freedoms and The Nuremberg Code have been violated by the Government of Newfoundland and Labrador in the implementation of its policies,

We the citizens of Newfoundland and Labrador charge the Government of Newfoundland and Labrador with extortion. Whether by design, ineptitude, or incompetence, the Government of Newfoundland and Labrador has, knowingly or unwittingly, committed the crime of extortion against the people of Newfoundland and Labrador.

We the people want a thorough investigation into the Government of Newfoundland and Labrador to see if there is criminality in this regard.
